

BP Oil Spill EPA Recommended Monitoring for Rapid Response

Met One Instruments, Inc. responded quickly to the USEPA request for particulate monitoring instruments and training at the beginning of the tragic Gulf Coast Oil Spill. We have already been to USEPA Region 4 to train people on the use of the portable E-BAM and BAM 1020 monitors.

Met One On-Site Training May 2010

Please contact us at sales@metone.com and use 'OIL SPILL' in your subject line for a rapid response and information on what we recommend by way of monitoring your site. We have the following instruments available:
